

**DENTAL COMPOSITION BASED ON SILICONE CROSSLINKABLE BY
CATION PROCESS**

5

Abstract of the Disclosure

The invention concerns dental compositions. Said composition comprises (1) a silicone crosslinkable
10 and/or polymerizable by cation process; (2) an efficient amount of at least an initiator such as onium borate; (3) at least a photosensitizer ; and (4) a dental filler present in the composition in a proportion of at least 10 wt. % relative to the
15 composition total weight. Said dental compositions are useful for making dental prostheses or for dental restoration.
